Index to Subjects—Volume 33, 1996

Current Microbiology
An International Journal
© Springer-Verlag New York Inc. 1996

Accuprobe system, molecular characterization of *Mycobacterium avium* complex isolates from Caribbean AIDS patients by, 352
Acetogenic bacteria, H_2/CO_2-utilizing, from feces on non-methane-producing humans, 94
Acid tolerance response, of *Lactococcus lactis* subsp. *lactis* to lactic acid stress, 194
Acyrthosiphon pisum (Harris), phylogenetic affiliation of new Rickettsia in, 123
Aeromonas hydrophila strains, O:34 antigen expressed by, 104
Agaricus bisporus
cell wall polysaccharides of monokaryotic strains and dikaryon of, 211
isolation of *Ewingella americana* from, 334
Agrobacterium tumefaciens, protein synthesis induced by octopine, nopaline, and arginine in, 156
α-galactosidase, from *Lactobacillus fermentum*, influence of carbohydrates on activity of, 302
α-glucosidase, from *Thermomyces lanuginosus*, dextran-hydrolyzing activity of, 152
Anabaena variabilis ATCC 29413, induction of H_2 uptake and nitrogenase activities in, 11
Anthrax lethal toxin, cytotoxic effects on mouse macrophage-like cell line J774A.1, 224
Antituberculous drugs, comparative activity of, in *Mycobacterium tuberculosis* isolates and human macrophages, 167
Arginine, protein synthesis in *Agrobacterium tumefaciens* induced by, 156
Aspergillus fumigatus, keratinolytic activity of, 364
Aureobasidium pullulans, induction and inducers of pectolytic system in, 6

Bacillus cereus, production of emetic toxin cereulide by, 67
Bacillus thuringiensis spores, role in toxicity of purified Cry proteins toward Indianmeal moth larvae, 54
Bacillus thuringiensis subsp. *israelensis*, aggregation-mediated conjugation system of, 228
Bacterial translocation, of *E. coli* C25 in gastrointestinal tract of mice, effect of cyclophosphamide of, 78
β-glucosidase, from *Xylaria regalis*, purification and characterization of, 297
β-xylosidase activity, produced by *Trichoderma harzianum* strains, 71
Bifidobacteria strains, effect on cholesterol in presence of bile salts, 187
Brucella abortus, identification of gene encoding 17-kDa antigen of, in *Rhodococcus* sp. NI86/21, 26

Calcium-related agents, effect on protoplast transfection of *Lactobacillus casei* with phage PL-1 DNA, 359
Calonectria morganii, genetic variability among isolates and sexual offspring of, 249
Candida krusei, isolation and characterization of species-specific DNA probe for detection of, 147
Candida spp. infections, effects of antibacterial prophylaxis on colonization of in immunocompromised patients, 118
Cellobiase, effect of surfactants in production of, by *Nectria catalinensis*, 275
Cellulase genes, from *Cellvibrio mixtus*, cloning and characterization of, 60
Cellvibrio mixtus, cloning of *cmcI* and *exoI* cellulase genes from, 60
Ceratotoxin A, permeability of inner and outer membrane of *E. coli* K-12 altered by, 40
Cereulide, *Bacillus cereus* production of, 67
Chloromphenicol, role in increasing survivability during storage of exponentially growing bacteria, 312
Cholesterol, removed from growth medium by bifidobacteria strains in, 187
Cloning vectors, for lactococci based on plasmid encoding resistance to cadmium, 35
Clostridium acetobutylicum, topology of glucitol permeases of, 331
Clostridium difficile-associated colitis, analysis by immunoblotting and PFGE of isolates of, 220
Clostripain, role of linker nonapeptide as intramolecular inhibitor of automaturation of, 281
Colanic acid polysaccharide, role in serum resistance in vivo and in adherence, 383
Cold shock proteins, effect of different temperature upshifts on, 16
Copper, resistance to and accumulation of, in *Mucor rouxii* strains, 163
Cra protein, expression of *cydAB* operon in *E. coli* regulated by, 270
Crystal proteins, effect of *Bacillus thuringiensis* spores on toxicity of toward Indianmeal moth larvae, 54
Cyclophosphamide, effect on bacterial translocation in gastrointestinal tract of mice, 78
cydAB operon, of *E. coli*, interaction between Cra and Fnr proteins in regulating, 270
Cystic fibrosis, role of *Pseudomonas aeruginosa* rhamnolipids in, 109

Dextran, role of α-glucosidase from *Thermomyces lanuginosus* in hydrolysis of, 152
Dextranicin 24, purification and N-terminal amino acid sequence of, 136
2,6-Diaminopimelic acid sterioisomers, interconversion of and formation of lysine from, by rumen protozoa and bacteria, 306
DNA probe, for detection of *Candida krusei*, isolation and characterization of, 147
DT1/DT6-PCR, molecular characterization of *Mycobacterium avium* complex isolates from Caribbean AIDS patients by, 352

Encapsulated bacteria, adherence and virulence of, 383
Endoglucanase, effect of surfactants in production of, by *Nectria catalinensis*, 275
Endopolygalacturonases, purified from *Sclerotinia sclerotiorum*, 243
Enterobacter kobei sp. nov., phenotypic and genetic characteristics of, 261
Escherichia coli
adherence to latex-, silicone-, and silver-coated catheters, 1
clostripain linker deletion variants yield active enzyme in, 281
cooperative interaction between Cra and Fnr in regulation of, 270
role of type 1 fimbriae in adhesion to salivary mucin and secretory IgA, 200
topology of glucitol permeases of, 331
type 1 fimbriated, role of salivary MG2 and sIgA in adhesion of to oral surfaces, 200
Escherichia coli K-12, antibacterial peptide ceratotoxin A alters permeability of inner and outer membrane of, 40
Ewingella americana, isolated from *Agaricus bisporus*, 334
Exoglucanase, effect of surfactants in production of, by *Nectria catalinensis*, 275
Exopolysaccharides, role in adsorption of *Siphovirus* phage NM8 to *Rhizobium meliloti* M11S cells, 371

Flexibacter japonensis sp. nov., human leukocyte elastase inhibitor produced by, 89
Fnr protein, role in Cra-mediated transcriptional control in *E. coli*, 270

Galacturonic acid, pectinolytic enzyme production by *Sclerotinia sclerotiorum* regulated by, 49
D-Galacturonic acid, synthesis of pectic enzymes in *Aureobasidium pullulans* triggered by, 6
Globomycin, spiralin processing by *Spiroplasma melliferum* inhibited by, 317

Glucitol permeases, of *E. coli* and *Clostridium acetobutylicum*, topological model for, 331
Glucose phosphotransferase system, in diauxic and nondiauxic strains of *Streptococcus bovis*, 216
Glutamine synthetase, from *Pleurotus ostreatus*, purification and characterization of, 181
Group I intron, in nuclear small subunit rDNA of *Pseudohalonectria lignicola*, 84

Hematologic malignancies, antimicrobial therapeutic strategy on fungal colonization in patients with, 118
Hydrogen uptake, in *Anabaena variabilis*, effect of hydrogen and organic substrate on induction of, 11
Hyperthermophilic archaea, UV and ethyl methanesulfonate effects in, 377

Immunoblotting, of *Clostridium difficile*-associated colitis isolates, 220
Indianmeal moth larvae, effect of *Bacillus thuringiensis* spores on toxicity of purified Cry proteins toward, 54

Keratin, as carbon and nitrogen source for *Aspergillus fumigatus*, 364

Lactic acid stress, response of *Lactococcus lactis* subsp. *lactis* to, 194
Lactobacillus casei
effect of calcium-related agents on protoplast transfection with phage PL-1 DNA in, 359
expression of *Zymomonas mobilis pdc* and *adh* genes in, 256
Lactobacillus fermentum, effect of carbohydrates on α-galactosidase activity of, 302
Lactobacillus fermentum 104-S, adhesion to porcine stomach mucus, 31
Lactococcus lactis spp. *lactis* M71, plasmid encoding cadmium resistance identified in, 35
Lactococcus lactis subsp. *lactis*, lactic acid stress response of, 194
Lactose phosphotransferase system, in diauxic and nondiauxic strains of *Streptococcus bovis*, 216
Leuconostoc sp. strain, purification and N-terminal amino acid sequence of bacteriocin of, 136
Lipopolysaccharides, role in adsorption of *Siphovirus* phage NM8 to *Rhizobium meliloti* M11S cells, 371
lytA gene, role in formation of type 3 capsular polysaccharide of *Streptococcus pneumoniae*, 133

Macrophage phagocytosis, inhibited by *Pseudomonas aeruginosa* rhamnolipids, 109
Mouse macrophage-like J774A.1 cells, cytotoxic effects of anthrax lethal toxin on, 224
Mucor rouxii, copper resistance and accumulation in, 163
Mycobacterium avium complex isolates, from AIDS patients, genetic fingerprinting of, 352
Mycobacterium tuberculosis, activities of antimicrobial agents against drug susceptible and resistant isolates of, 167

Nectria catalinensis, effect of surfactants on cellulase production by, 275
Neuraminidase, produced by *Pasteurella multocida* A:3 in goats, 266
Nitrate reducing systems, of *Rhodobacter*, molecular and regulatory properties of, 341
Nitrogenase activities, in *Anabaena variabilis*, effect of hydrogen and organic substrate on, 11
p-Nitrophenol, in wastewater, role of bacterial inoculum size on biodegradation of, 292
Nopaline, protein synthesis in *Agrobacterium tumefaciens* induced by, 156

O:34 antigen, expressed in *Aeromonas hydrophila* strains of different origins, 104
Octopine, protein synthesis in *Agrobacterium tumefaciens* induced by, 156
Ornithine decarboxylases, isolated from fungi and compared with other organisms, 390

Paecilomyces carneus, production, purification, and properties of serine carboxypeptidase from, 44
Pasteurella multocida A:3, in goats, production of neuraminidase by, 266
PCR
probiotic lactic acid bacteria identified and detected by, 100
species-specific DNA probe for detection of *Candida krusei* by, 147
PCR assay, Rickettsia bacterium detected in pea aphids by, 123
Pectinolytic enzyme, galacturonic acid regulation of *Sclerotinia sclerotiorum* production of, 49
Pectolytic enzymes, synthesis in *Aureobasidium pullulans*, 6
Penaeus japonicus, isolation of *Vibrio harveyi* from, 129
Peyer's patches, role cyclophosphamide on morphological changes of, 78
Phage PL-1 DNA, effects of calcium-related agents on protoplast transfection of *Lactobacillus casei* with, 359
Phosphoglucoisomerase mutations, in *P. aeruginosa* mutants, characterization and genetic mapping of, 347
Pichia stipitis, characterization of the genetic system of, 237
Plasmid pRSC126, constructed from killer plasmid from *Kluyveromyces lactis* and expressing *xylA* gene, 323
Plasmid pRSC128, constructed from killer plasmid from *Kluyveromyces lactis* and expressing *hasB* gene, 323
Plasmid pXO16, aggregation-mediated conjugation system in *Bacillus thuringiensis* subsp. *israelensis* encoded on, 228
Pleurotus ostreatus, purification and characterization of glutamine synthetase from, 181
Porcine stomach mucus, adhesion of *Lactobacillus fermentum* 104-S and saccharide to, 31
Probiotic lactic acid bacteria, PCR methods for identification and specific detection of, 100
Production of ethanol (*pet*) genes, cloned and expressed in *Lactobacillus casei*, 256
Pseudohalonectria lignicola, identification of group I intron in nuclear small subunit rDNA of, 84
Pseudomonas aeruginosa
characterization and genetic mapping of phosphoglucoisomerase mutations in mannitol-negative mutants of, 347
ultraviolet-B lethal damage on, 141
Pseudomonas aeruginosa rhamnolipids, inhibition of macrophage phagocytosis by, 109
Pseudomonas fragi, effect of different temperature upshifts on protein synthesis by, 16
Pulsed field gel electrophoresis (PFGE), of *Clostridium difficile*-associated colitis isolates, 220
Pyrococcus abyssi, mutagenic effect of methanesulfonate and UV on, 377

Random amplification of polymorphic DNA (RAPD), genetic variability among *Calonectria morganii* strains based on, 249
Restriction fragment length polymorphism (RFLP), genetic variability among *Calonectria morganii* strains based on, 249
Rhizobium meliloti M11S cells, roles of exopolysaccharides and lipopolysaccharides in adsorption of *Siphovirus* phage NM8 to, 371
Rhodobacter, molecular and regulatory properties of nitrate reducing systems of, 341
Rhodobacter capsulatus, effect of growth in chemostat cultures on photosynthetic apparatus of, 176
Rhodococcus sp. NI86/21, gene cluster encoding homolog of 17-kDa antigen of *Brucella* identified in, 26
Rumen protozoa and bacteria, *in vitro* metabolism of stereoisomers of 2,6-diaminopimelic acid by, 306

Salivary mucin, as receptor for adhesion of type 1 fimbriated *E. coli* to oral surfaces, 200
Sclerotinia sclerotiorum
galacturonic acid regulation of pectinolytic enzyme production by, 49
purification of endo polygalacturonases from, 243

Secretory IgA, as receptor for adhesion of type 1 fimbriated *E. coli* to oral surfaces, 200
Serine carboxypeptidase, from *Paecilomyces carneus*, production, purification, and properties of, 44
Southern hybridization, molecular characterization of *Mycobacterium avium* complex isolates from Caribbean AIDS patients by, 352
Soybean galactosaccharides, effect on α-galactosidase activity from *Lactobacillus fermentum*, 302
Spiroplasma melliferum, inhibitory effect of globomycin on, 317
Streptococcus bovis, catabolite regulation in diauxic and nondiauxic strains of, 216
Streptococcus pneumoniae, formation of type 3 capsular polysaccharide of, 133
Survivability, of exponentially growing bacteria during storage methods for increasing, 312

Thermomyces lanuginosus, extracellular α-glucosidase with dextran-hydrolyzing activity from, 152
Transformable marine bacterium, use of phylogenetic classification system in determining identity of, 287
Trichoderma harzianum strains, β-xylosidase activity produced by, 71

UDP-glucose dehydrogenase (*hasB*) gene, expressed in yeast with *Kluyveromyces lactis* linear killer plasmids as vectors, 323
Ultraviolet B, lethal effect on *Pseudomonas aeruginosa*, 141
Urinary tract catheters, comparison of bacterial adherence in latex-, silicone-, and silver-coated, 1

Vancomycin, overgrowth/persistence of *Candida* species in mouth and gut induced by, 118
Vibrio harveyi, isolated from diseased kuruma prawns *Penaeus japonicus*, 129
Vibrio WJT-1C, reclassified as pseudomonad, 287

Wastewater, biodegradation of *p*-nitrophenol by bacterial inoculation in, 292

Xylaria regalis, purification and characterization of extracellular β-glucosidase from, 297
Xylose fermentation, application of genetic methods during studies on, 237
Xylose isomerase (*xylA*) gene, expressed in yeast with *Kluyveromyces lactis* linear killer plasmids as vectors, 323

Zymomonas mobilis, cloning and expression of *pdc* and *adh* genes of, in *Lactobacillus casei*, 256
